1.0 PURPOSE OF THE AMENDMENT

The purpose of this amendment is to update the compliance record for the Envision Gaza 2020 Project and to extend the end date of the project till April 20, 2022. This extension of the duration of the project will not have any implications on the approved program description mentioned on the approved IEE (ME 15-57) on July 30, 2015. The originally approved Environmental Documentations remain unchanged.

2.0 CERTIFICATION OF COMPLIANCE

- All other aspects of the project design/activities and geographic scope remain unchanged from previous environmental analyses.
- Annual Work Plan(s) has/have been verified to undertake only those activities originally proposed, and all reporting requirements have been adhered to and remain unchanged. This project is in compliance.

3.0 BEO CONDITIONS OF APPROVAL

- Environmental Mitigation and Monitoring Plan(s): The COR will ensure the IP develops, obtains USAID approval for, and implements Environmental Mitigation and Monitoring Plan(s) (EMMP) that appropriately respond the environmental and social impacts and risks identified in the IEE.
- Integration of CRM throughout the duration of implementation: The Implementing Partner shall identify opportunities to reduce greenhouse gas (GHG) emissions and propose emissions approaches where possible. For example, this may include opportunities such as energy efficient equipment, building efficiency measures, etc.
- The Implementing Partner shall perform screening for climate change risk as early as possible during the planning/design stage. Climate Change analysis and considerations shall be reported under the EMMP.
- The IP will ensure compliance with all host government and USAID requirements for disease prevention and ensure its staff and volunteers receive appropriate and timely guidance and training on the latest mitigation measures to prevent the spread of COVID-19 and other infectious diseases. This includes, but is not limited to proper hygiene, use of masks and gloves, cleaning/disinfecting, and social distancing, as appropriate.

4.0 REVISIONS

Per 22 CFR 216.3(a)(9), when ongoing programs are revised to incorporate a change in scope or nature, a determination will be made as to whether such change may have an environmental impact not previously assessed. If so, this environmental analysis will be amended to cover the changes. Per ADS 204, it is the responsibility of the USAID A/COR to keep the MEO/REA and BEO informed of any new information or changes in the activity that might require revision of this amendment and environmental determination.
